DETAILED ACTION

Drawings

- R*
8/23/02
1. The drawings are objected to as failing to comply with 37 C^FAR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 33. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 33,35, and 105-106 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al.

Art Unit: 3636

Brown et al show a leg assembly comprising a sleeve (23), a slider (31) received in the sleeve and movable relative to the sleeve (23), a spring (40) positioned between the sleeve and the slider, and a leg (39) received in the sleeve and adjustably mounted to the slider (31) so that the position of the leg is adjustable relative to the slider. A spring base (32) is mounted to the sleeve (23).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3636

6. Claim 107 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al.

Brown et al disclose the claimed invention except for the spring base to be integrally formed with the sleeve. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the spring base to be integrally formed with the sleeve, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).

Allowable Subject Matter

7. Claims 34 and 104 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Remarks

The examiner has reviewed and considered the applicant's comments in the Amendment, filed on June 12, 2002. Based on updated search of the application, the examiner has decided to issue a new ground of rejections. Accordingly, this Office action has been considered to be Non-final.

Art Unit: 3636

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kennedy, Bartlett et al, Ko, Vrooman, and Raia are cited as showing similar types of leg assembly.

9. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Stephen Vu, whose telephone number is (703) 308-1378.
